#### **Train Derailment, Carson, Los Angeles County, SPILL: 18-3296**

On 05/21/18 at 1959 hours, the California State Warning Center (CSWC) received report from Union Pacific Railroad (UPRR) that two empty boxcars derailed in the upright position due to unknown cause.

- There were no hazardous materials released and no injuries reported.
- CSWC personnel performed notifications per SOP.

#### **Virulent Newcastle Disease in Chickens, Downtown Los Angeles, Los Angeles County**

On 05/18/18 at 1105 hours, the California State Warning Center (CSWC) received a report from the California Department of Food and Agriculture (CDFA) that CDFA had detected virulent Newcastle disease in 10 chickens in Downtown Los Angeles, Los Angeles County.

Per CDFA on 05/21/18 at 1640 hours:

- No new infected chickens have been found.
- CDFA is not convinced that there are no other locations with disease.
- CDFA and USDA are actively working with FBI and local law enforcement including animal control.
- Law enforcement continues to put intel packages together and share useful information with CDFA/USDA.
- CDFA is making good use of their outreach and poultry health connections to the urban poultry community.
- CDFA does not have a regional quarantine in place because they have yet to find an actively infected premises.
- CDFA is conducting area surveillance around the reported home location of the infected flock, which is under quarantine, as well as in other areas of concern.
- CDFA is actively looking for disease and will continue to provide regular updates.

#### **Cal OES SOUTHERN REGION (Continued)**

##### **Background:**

- The detection has been confirmed by the United States Department of Agriculture's (USDA) Animal and Plant Health Inspection Service (APHIS).
- This is the first case of virulent Newcastle disease, previously referred to as exotic Newcastle disease, in the US since 2003.
- There is no commercial poultry production and no farms in the immediate vicinity.
- Virulent Newcastle disease is not a food safety concern.
- No human cases of Newcastle disease have ever occurred from eating poultry products.
- Infection is easily prevented by using standard personal protective equipment.
- State Officials quarantined potentially exposed birds and have tested for the disease.
- Cal OES is monitoring and remains on standby to assist as warranted.

# WEATHER SYNOPSIS BY REGION

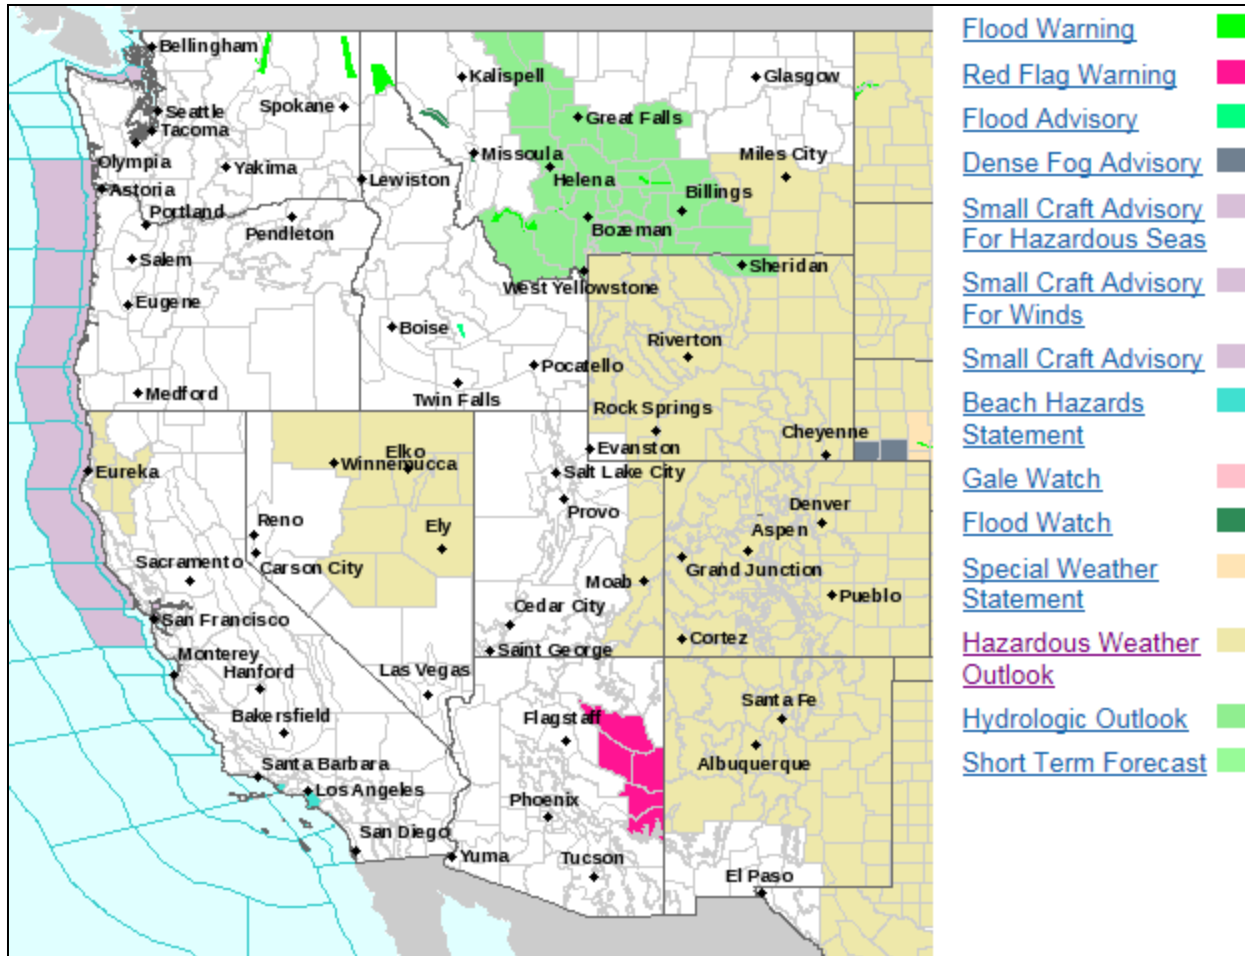

## **NORTHERN CALIFORNIA**

Afternoon and evening thunderstorms are possible mainly over higher terrain this week. These may extend through the Valley late in the week. Slightly cooler than normal temperatures continue across most of the region this week warming to above normal early next week.

## **SOUTHERN CALIFORNIA**

Any shower activity should remain confined to the mountains through today. Some warming will occur away from the beaches this week, especially across the deserts, but daytime highs will remain a bit below average most areas into the weekend. At the beaches, a south swell will bring elevated surf much of the week.
